The UK early childhood system

Professor Dr Eva Lloyd

Starting Early Starting Well II

Prague, 5 November 2015
At the start

- Universal and free maternal child health services via National Health Service
- Maternity pay and leave; Paternity pay and leave; shared Parental leave since 2015
- Health Visitor home visits from birth to 5
- From 2015, children’s integrated health and education review at 2/2.5 years
- Sure Start Children’s Centres
- Multi-professional early intervention services
Early services: impact and pressure points

• *According to Fair Society Healthy Lives* (2010), a major review of health inequalities: ‘proportionate universalism’ has most impact

• From 2013 Local Government has responsibility for public health, but since 2010 Local Government budgets cut by up to 40%

• Health visitors restrict visits to disadvantaged children after first few weeks

• More than 600 Sure Start Children’s Centres in England out of 3507 have closed since 2010
Early childhood education

• Since 1998 UK offers universal, non-compulsory, part-time education for 3 and 4 year old children
• Since 2010 targeted education offer for up to 40% of 2 year olds living with disadvantage, including children with special educational needs and/or disabilities (SEND)
• Early education delivered within mixed market of state schools alongside private-for-profit and not-for profit childcare businesses, including family day care
• September intake in primary school non-compulsory ‘reception classes’ of children aged 4, since 2011
## Early education in 4 UK nations

Variation between 4 UK nations

• Since 1998 devolved responsibility for universal early childhood education, not for childcare
• Since 2009 devolved responsibility for targeted 2 year old education
• 4 nations decide independently on curriculum, workforce qualifications, inspection regimes and funding levels, but many similarities remain
• In England and Wales Local Government has ‘sufficiency’ duty for early education and childcare provision
Early childhood education: a commitment to inclusion

“All children, irrespective of ethnicity, culture or religion, home language, family background, learning difficulties or disabilities, gender or ability should have the opportunity to experience a challenging and enjoyable programme of learning and development.”

(DCSF, 2008, 10)
Impact and pressure points

• Early education uptake lower among disadvantaged children and outcomes worse
• Differences in quality, adult child ratios and workforce qualifications/conditions between state school-based early education and that delivered within private childcare businesses
• In England take-up of 2 year old free education 42% below target at start of 2015
• 96% of eligible English 2 year olds receive free education in private childcare businesses, not in state schools
The UK childcare system

• UK childcare market model rare in Europe

• For-profit childcare businesses, mostly small, but including stock-market listed (international) chains, play major role in childcare and early education provision

• Childcare affordability challenge, as any state support for parents paid retrospectively

• Levels of state support for childcare costs have decreased since 2010

• Parental childcare fees are payable monthly in advance within the childcare market
Childcare: impact and pressure points

• Nearly 66% British parents receive no employer vouchers or tax credit help with formal childcare costs; tax credit system is in state of flux
• In the last 18 months, costs of part-time 2 year old childcare place increased by 33% while wages remained stagnant
• Fiscal authorities (2011) estimated 20% parents did not receive childcare tax credits they were entitled to during 2009/10
• Childcare access complicated by increasingly irregular parental employment patterns
Children at the margins: SEND in England

- 2008 Early Years Foundation Stage programme (revised 2012, 2014) stipulates services should ‘support ‘ children with SEND
- 2014 Children & Families Act /SEND Code of Practice: providers must ‘have regard to’ SEND
- Early education support/funding system for SEND children in state schools differs from that in private childcare sector
- Local Government must assess early Education, Health and Care needs, if child may need an EHC plan in school
Children at the margins: Roma in England

- Low uptake of early education by Roma (Gypsy, Traveller and Roma) children
- Additional 2009 guidance to EYFS encourages their inclusion in early childhood provision
- Roma children underachieve in early childhood provision as measured by the *Early Years Foundation Stage Profile*
- Sure Start Children’s Centres, Traveller Education Support Services (TESS) teams and NGOs, e.g. Save the Children UK, promote Roma inclusion through outreach programmes
Roma inclusion in early childhood provision: UK context

• UK still lacks National Roma Integration Strategy; only Wales has a Roma Integration Strategy and Framework for Action
• Lack of UK monitoring data on Roma integration
• Significant health inequalities; poor living conditions, accommodation, education and employment; discrimination and social exclusion
• Roma lack of access to local decision making structures affects Roma children’s experiences
Summary and conclusions

• Huge increase in provision and uptake of early childhood education and care since 1997

• Access to quality early education/affordable childcare for poor, including Roma, children jeopardized by UK childcare market model

• The right of all children, including children at the margins, to high quality and universal health, social care and early childhood provision is not yet fully realised in practice, despite good policy intentions

• Inclusion has gained a higher profile, but requires better resourcing and more outreach
